Personal Details

Date of Birth: 2nd Nov 2001

Languages Known: English, Hindi and Marathi

Address: Pune, Maharashtra

Profile Summary

- A **CDAC certified** full stack developer with high **problem-solving skills** and hands-on coding experience.
- I have **proficiency in backend technologies** and built projects which can be used by a widespread of people.
- Showcased **Java backend skills** through projects like an **eCommerce website** and **School management system**.
- Designed and developed a **SharePoint Navigation Tile Panel** and an **Open Issue Charts Dashboard** using **SPFx, React.js, and Redux**
- Created a responsive **Myntra Clone** and a **real-time Weather Application** using **React.js**, showcasing modern frontend development capabilities.

Projects

Navigation Tile Panel (Marquardt)

Tools: SPFX React.js, CSS

- Developed a dynamic, category-based tile navigation panel in React.js and SPFx.

Responsibilities:

- Implemented category-based headers that dynamically render corresponding tile panels, enabling users to seamlessly navigate across multiple SharePoint sites and lists.
- Implemented responsive UI with custom CSS and real-time updates for seamless cross-site navigation
- Added admin controls for managing tiles/categories with edit mode toggle and role-based access, boosting content management efficiency by 40%.

Open Issue Charts Dashboard (Marquardt)

Tools: SPFx, React.js, React Redux, REST API,

Built an interactive dashboard using React.js, Redux to visualize SharePoint issue tracking data.

Responsibilities:

- Integrated dynamic pie and bar charts to display metrics like priority, due date, status, and assignee
- Implemented real-time chart rendering directly from Redux store, Enabled one-click sync functionality to reflect updates instantly across charts, enhancing interactivity by 35%.
- Maintained consistent UI state and high performance using Redux for seamless component updates.

School Management System (June - July 25)

Tools: Spring Boot, Hibernate, MySQL

Developed a school management system using spring Boot Demonstrate Skill Proficiency

Responsibilities:

- Developed a role-based school management system. Implemented JWT token-based authorization to secure APIs and restrict access based on roles (Admin, Teacher, Student).
- Enabled student registration with course selection function. Designed teacher onboarding with course assignment features, improving faculty management and scheduling accuracy.
- Integrated Hibernate ORM for seamless data persistence and optimized database operations for faster performance.

Market Mingle -Online Local Store Management System (Feb 2024 – March 2024)

Tools: Spring boot, Hibernate, MySQL, React.js, CSS.

An Ecommerce web application to Connect Buyers with Local Sellers to Boost Business and Simplify Shopping.

Responsibilities:

- Built an innovative multi-seller e-commerce platform to connect local sellers and buyers, increasing local business engagement by 60%.
- Enabled users to browse through the product catalog, create carts with items from seller shops.
